PHYSICAL HEALTH SERVICES

PHYSICAL HEALTHCARE SERVICES

In addition to mental health programs, Thresholds has partnered with the University of Illinois at Chicago (UIC) and other Federally Qualified Health Centers to provide high quality medical care to its members. UIC Integrated Health Care (IHC) clinics are located at two Thresholds program sites - Bridge South and the Young Adult Program. The IHC clinics are staffed by nurse practitioners who can provide many of the services provided by doctors, including conducting physical exams and prescribing medications. The IHC clinics accept Medicaid, Medicare and offer a sliding fee scale for members without insurance. The IHC clinics are part of Mile Square Health Center of the University of Illinois.

Thresholds also partners with other Federally Qualified Health Centers, including PCC Wellness that mainly serves the west side of the city and some near west suburbs, and Aunt Martha's that serves the south suburbs and the Kankakee area. Thresholds hopes to continue improving and expanding quality integrated medical care with these and other partners.

Please see your Thresholds support staff to make an appointment with one of our healthcare providers.
